

A Feynman diagram equation. On the left, a double horizontal line with an arrow pointing right. This is followed by an equals sign. To the right of the equals sign is a single horizontal line with an arrow pointing right, followed by a plus sign. To the right of the plus sign is a diagram consisting of a single horizontal line with an arrow pointing right entering a shaded gray circle. Inside the circle is a sigma symbol (Σ). A single horizontal line with an arrow pointing right exits the circle from the right, which then splits into a double horizontal line with an arrow pointing right.
